

CHOICE WILD PLANTS

Collected From Their Native Haunts By

HOPEDALE NURSERIES,

J. W. Griesemer, Prop.

Our collectors cover practically the whole country. We can secure almost any native plant, if given time to locate it.

This revision of our list was made nearly a year ago. Circumstances prevented getting the necessary checking over, additions and omissions made, till now. Our former list is entirely exhausted, we were forced to take the time to do it now. We hope that it meets with your approval.

So far as possible, we have followed the "Standardized Plant Names" in our nomenclature. This will save confusion on the many names formerly used, since Standard Plant Names is the product of A. A. N. Am. Hort. Society, and practically all medicinal and governmental departments having to do with Plants. It is far more authentic than any of the many former names applied to the same plant.

We have dropped some items parasitic, and not readily transplanted; some too scarce to secure with any degree of certainty, and a few proving to be annuals. We have added many new sorts not formerly listed by us.

TERMS.

5 at 10 rates; 50 at 100 rates, 500 at 1,000 rates. If you want thousands or a large lot of this material, it is best to send your want list for our special quotations. If wanted out of season, requiring crating of tops, or other expense, the cost of doing this will be added.

10 days to regular customers.

30 days to dealers, nurserymen and landscapists.

Nurserymen and bona fide dealers are entitled to special prices. Send your list of wants for quotations. Landscapists or Gardners, Superintendents etc., get their pay from their clients, and are not entitled to special prices, other than quantity discounts. This is only business ethics, and standard.

Packing done free, at prices herein, except as mentioned above.

Complaints must be made at once. We cannot allow claims after delay that might allow stock to ruin. Please report shortage, or any otehr complaint at once that it may be adjusted.

All Prices f. o. b. here, or at point of collection. Larger lots are usually sent out directly from collecting point. Saves time and cost of delivery. We Guarantee stock to be in good order when sent out, and up to grade. If anything reaching you from any of our collectors in Not Right, please notify us at once. We want to make good.

Nearly all plants go out when collected, which is usually the Best time to plant them. Send Orders Early to allow us to get scarce plants located, and collected at the best time to do it. We each profit by this. Many failures so secure plants could be avoided if we had the orders in time. Sud-

Rudbeckia

Helianthus

Vinca

den droughts, floods, frosts, excessive heat, etc., cause plants to disappear—often next to impossible to collect. Collectors are lovers of plants, but too often no business people at all! Often they are not to blame, per above. We mention this that you can bear with our disappointments better. We have them, tho we try hard to fill all orders.

MISTAKES: We make them, so do our collectors. We want to correct them, if reported at once. They are easily found then, usually. Later they are not. **REPORT MISTAKES AT ONCE.**

SEEDS: We are often asked to get these. Usually we can do this, if ordered **BEFORE** they ripen—such sorts and seasons as produce seeds but do not store them. **ORDER EARLY.**

DONT FORGET that our principal business is the Nursery. If interested in nursery grown stock, ask for our literature on that, or send list of items wanted.

We are members American Association Nurserymen, Ill. State Nurserymen's Assn., Am. Propagators Assn., Ill. State Hort. Society and other allied associations. This ought to be reference enough. If you want more, Hopedale National Bank, Peoria branch either Dunn's or Bradstreet's can tell you whether we are reliable and responsible or not. Likely you can be referred to a neighbor who has had dealings with us. We are not afraid of investigation. Look us up.

OUR BUSINESS IN WILD PLANTS HAS GROWN BEYOND ALL EXPECTATIONS.
"There's a reason."

Yours to serve,
J. W. GRIESEMER, Prop.

EXPLANATION

To aid planters as much as possible in their selections, we have listed plants in 1st botanical name—the only reliable one, since common names vary with each community, 2nd, the best known common name. 3rd column, where they grow in nature, 4th, Color of blossom; 5th, when they bloom. The column at right of price columns tells where we usually secure our stock. H or Here, indicates that stock is secured here. I-Indiana; M-Mich; N. D.-North Dakota; Col.-Colorado; N. Y. and N. H., Vt. etc. are standard and need no explanation. For Example: N. C. H. & M. indicates we secure this item from North Carolina, Here and Mich. A few items are listed at different prices from different locations. Usually the higher prices are cheaper, especially for northern growers.

A border of Phlox

PERENNIALS

Botanical name	Common name	Where it Grows	Color of Flower	Time of Bloom	Each	10	100	Where Native

<i>Vincetoxicum gonocarpos</i> , climbing Milkweed, open river bottom, pink, Jul.-Aug.	.25	2.00	15.00	Here

SHRUBS

We are now required to have all collected Shrubs and Vines with woody tops, inspected, like nursery grown stock. This means that we must either get a large lot stored here, and have an inspector come to look it over, or send less lots to Urbana, Ill., to be inspected, and sent on to customers directly from there. Otherwise the cost would be so great that we would be forced to abandon getting out this line. We state this, that you will not be impatient at the stock's not arriving as promptly as expected. Perennials do not require this inspection, in this state. They DO require it in Mich., but we think we have it arranged to reduce the delay to a minimum. Ind., shrubs must be inspected before leaving that state. It is a NEW TROUBLE, but it will likely get so systemized soon as to cause little delay.

<i>Benzoin aestivale</i> , Spice Bush, red berries, 1 to 2 ft.....	\$.10	\$.80	\$7.00	H&Ind.
2 to 3 ft.	.15	1.25	10.00	H&Ind.
